

Highlights:

- + Modern design and unique way of working to your advantage.
- + Imaging of different saw tip shapes and sizes.
- + No more conventional brazing - special feature of the heating inductor.
- + Unique 90° flux dispensing system for cermet saw tips.
- + Linear controlled loading and unloading system.
- + Integrated water cooling - water tank drawer for easy cleaning.
- + Program controlled for off-center brazing of the saw tips.
- + Intelligent fault indication with cause, place, date, time and duration of the disturbance.
- + Database stores up to 75 parameters of different saw blades.

Ultimate Brazer H65

Highlights:

- + 5 Axis servo control.
- + Smart camera for capturing different size and shape of saw tips.
- + Precise dispensing flux in line or in small dots.
- + Engineered for quick change over to different materials by "one touch setting" in Software and mechanical settings.
- + Eco drive mode turns off the electricity and the compressed air for saving electricity.
- + Intelligent error display showing the reason, position, time and recovered time.
- + Remote maintenance via network interface.
- + Fixed tip centering system of the saw body and the saw tip.
- + Automatic annealing cycle with temperature control and choice of disabling annealing process.
